Pump terminology explained in a simple way

FROM PUMP SEARCH TO PURCHASE

impeller.net provides a convenient, **cross-manufacturer information system** for centrifugal pumps, which leads the user through a competent product decision to a specific supplier.

Users can select one or more pumps and compare them with one another. They can then either buy the selected pump via a web shop (e.g. eBay, special pump web shops, manufacturer web shops) or send an inquiry directly to the manufacturer.

FROM PUMP SEARCH TO PURCHASE

ADVANTAGES FOR PUMP MANUFACTURERS

- Direct contact with the target group and increase of brand awareness
- Expansion of the customer base and increase in turnover
- You determine which product data is to be used
- Use of existing databases via a web service
- No additional effort for data updates
- Optional integration of your own web shops
- Statistics for search queries, overview of purchases in the shop
- Possibility to link press releases directly with PumpSelector

ADVANTAGES FOR WEB SHOPS

- Publication of offers in self-chosen regions worldwide
- Direct contact with the target group and increase of brand awareness
- Expansion of your customer base and increase in turnover
- Qualified search queries with detailed specifications (pump data)
- Use of manufacturer data without your own data maintenance
- Simple integration via various interfaces
- Statistics for search queries
